Projects

CABIT

Jan 2025 - Feb 2025

Developed a cab booking web and mobile application that enables users to book rides, view available drivers, and track trip details in real time. The system provides a user-friendly interface for customers and an admin panel to manage drivers, bookings, and payments. Focused on responsive design, smooth navigation, and efficient backend integration to ensure a reliable and scalable transportation solution.

Zenith Engineering Solutions

Feb 2025 - Apr 2025

At Zenith Engineering Solutions, we are dedicated to delivering innovative and customized Building Information Modeling (BIM) solutions that transform the way construction projects are planned, executed, and managed. Our focus is on enhancing accuracy, efficiency, and collaboration across all project stages, enabling smarter decision-making and successful project outcomes.
